

# DEMOLITION DOLL RODS

The Demolition Doll Rods are children of God who were sent to this planet to inspire the creative forces that lie at the heart and soul of each and every living creature. Through the forces of the powers that be, Danny, Christine and Margaret Doll Rod venture far and wide. Through (or by) the grace of God, they will rock, they will roll, they will out-of-control every heart and soul that be. As they get around, they will strip you down, pow your wow, challenge you to live right here and right now. Each and every nation shall experience this sensation. If you can, you will and they do. They will drive you out of your mind and into your soul. They are here to let you know who you are is what you be and to each of us, all is everything.

**As a person who has never really heard a lot of your music, could you describe your sound and style to us?**

Mind bending, soul shakin, stripped down, straight up rock 'n' roll.

**Your stage presentation has a lot of seemingly sexual overtones to it. Do the Demolition Doll Rods get a lot of flack from people concerning the image and/or stage antics?**

Actually, we don't get a lot of flack about our stage presentation. Most people are comfortable enough with who they are and their own sexuality that they just feel inspired and have fun.

**If I were to come to one of your shows, what could or should I expect to see?**

Sweat, ass shakin, and frenzied love.

**You have two full-length releases under your belt. Can you tell us a little about them and let us in on plans for anything new?**

Our first LP, *Tasty*, came out in '97 on In the Red Records. The second, *TLA*, came out in 1999 on Matador Records. The new one is almost ready for release. We're fine tuning it and honing it into an elegant surprise.

**You seem to throw a cover or two on each release. Any new ones coming up?**

We love to throw a lil' surprise cover into our set and have recorded many. Just not sure which one is gonna make it to the new release.

**How has the band evolved as the years pass? Has the lineup stayed the same?**

When the Doll Rods first started, we had a different drummer for about 6 months. Ever since then, it has been the three of us: Margaret, Danny and Christine.

**What have you been listening to lately?**

Danny has been listening to David Bowie with Mick Ronson on guitar, garage punk unknowns and Elvis. Christine has been listening to Rappers Delight and other old school jams, James Brown and Bobby Gentry. I have been listening to some Children's gospel. Mostly This Little Light of Mine, Martha Jean the Queen, and John Lee Hooker.

**It's my understanding that you hail from Detroit. What kind of scene exists there?**

Detroit has all different kinds of bands. It depends on what you're looking for. None of us are really into scenes, so we just go to shows that we like and make our own magic.

**Anything we all should know about Demolition Doll Rods?**

The only other thing you should know about the Doll Rods is that you have to feel it to believe it. God bless and rock on!
